Project Information Form

Project Title	Georgia SPLOST Database and Clearinghouse for Transportation Finance
University	Georgia Institute of Technology
Principal Investigator	Professor Catherine L. Ross
PI Contact Information	Catherine.ross@coa.gatech.edu 404-385-5130
Funding Source(s) and Amounts Provided (by each agency or organization)	$ 54,860.00 – Georgia Tech Foundation (GTF)
Total Project Cost	$ 54,860.00
Agency ID or Contract Number	487561W/ RC 614
Start and End Dates	Start Date: 01/01/2011 End Date: 06/30/2013
Brief Description of Research Project	There is a need for comprehensive information on SPLOST votes, in order to guide the success of future potential SPLOSTs. The purpose of this research was to collect this data as well as to identify and collect other types of data also known to influence voting outcomes. The data was then assembled in a comprehensive database, such that it could be hosted in a web-based spatial mapping tool. This tool enabled those utilizing the data to access, understand, and analyze the data in a new way.
Describe Implementation of Research Outcomes (or why not implemented) (Attach Any Photos)	The data clearinghouse was developed for this project and has been made available to Department of Transportation officials and local and county decision makers and legislators.
Impacts/Benefits of Implementation (actual, not anticipated)	The data that was collected and the availability of that data in an interactive web-based format will help to facilitate the exchange of information and knowledge between Department of Transportation

	officials and local and county decision makers and legislators.
